

# ROCHELLE BRUNO

IT Student | Web Development | Technical & IT Support | Cybersecurity  
Sharjah, UAE | rochb1509@gmail.com | +971501905822 | [Portfolio](#)

## PROFILE

InformationTechnology student (BSc, expected November 2026) with hands-on experience in web development, technical support, and large-scale event operations. First-place CTF winner with demonstrated skills in penetration testing, vulnerability identification, and cybersecurity. Skilled in front-end development, IoT systems, and cross-functional collaboration, with a strong foundation in programming, networking, and data science concepts.

## PROFESSIONAL EXPERIENCE

### Dubai Electricity and Water Authority (DEWA)

Sep – Oct 2025

B2B Support Team Volunteer, WETEX 2025

- Coordinated onsite meetings for the Polish Pavilion (Wielkopolski), supporting delegate scheduling and pavilion logistics.
- Liaised between pavilion representatives and event organizers to maintain clear, timely communication throughout the event.
- Managed visitor schedules to keep event operations running smoothly across a high-traffic, multi-day exhibition.

### Al Zubair Groups

Jul – Aug 2025

Web Development Intern

- Developed and updated web pages to improve user experience and interface design.
- Redesigned site layout and structure, improving responsiveness across devices.
- Collaborated with IT and marketing teams to plan and implement design improvements.

### Meccademia Education

Jun – Jul 2025

Technical Intern, IcHO 2025

- Set up and configured computers and examination halls ahead of test sessions to ensure technical readiness.
- Provided on-site technical support during exams, resolving issues in real time to minimise disruption.
- Scanned and uploaded answer sheets immediately after each exam session, meeting strict turnaround deadlines.

## CERTIFICATIONS & TRAINING

## PROJECTS & COMPETITIONS

---

### Responsive E-Commerce Fashion Platform

May 2025

*Frontend Web Development Project*

- Engineered a fully responsive frontend e-commerce architecture using semantic HTML5, advanced CSS3 (Flexbox/Grid), and vanilla JavaScript to deliver a seamless shopping experience.
- Implemented dynamic client-side features including a state-managed interactive shopping cart, multi-attribute product filtering (size, color, price), and real-time total calculations.
- Optimized user experience (UX) with fluid animations, intuitive navigation flows, and media-query breakpoints to ensure flawless cross-device compatibility and high-performance rendering.

### Bug Tracker & Issue Management System

Sep 2025

*Full-Stack Web Development Project*

- Architected a full-stack issue tracking application using Flask, MySQL, and vanilla JavaScript, supporting user authentication, role-based access, and full CRUD functionality.
- Developed a dynamic front-end interface with real-time status filtering (open, in progress, resolved) and priority tagging to streamline project management workflows.
- Implemented RESTful API endpoints and a relational database schema designed for scalability, enabling multi-project and multi-user support across a single deployment.

### Cyberverse Capture the Flag (CTF)

*National-Level Inter-University Competition · Team: want2cry · 🏆 1st Place*

Dec 2025

- Competed against 30 teams from 15 universities in a national-level CTF hosted by DEF-X Cyber Intelligence and Demont Institute of Management and Technology.
- Demonstrated vulnerability identification in web and binary applications, showcasing penetration testing capabilities across multiple domains.
- Led team strategy and coordination, contributing to a first-place finish.

### Dubai Customs Hackathon 2026

May 2026

*Hackathon · Team: CodeBlooded*

- Tackled the challenge: how Dubai can promote alternative air, sea, and land routes for supply chain and logistics companies in line with Dubai Customs resources.
- Brainstormed, designed, and presented a logistics optimisation solution aimed at strengthening Dubai's position as a global trade hub.
- Pitched to and received feedback from industry experts, collaborating effectively under time pressure.

### Smart IoT-Based Cooling System for Solar Panels

Jun 2026

*Full-Stack IoT Project*

- Engineered an edge-computing system using an ESP32 microcontroller, DHT22 sensors, and MicroPython to monitor temperature and trigger evaporative cooling for solar panels.
- Coordinated ultrasonic misting nozzles via a 5V solid-state relay array, with telemetry streamed to a Flask middleware engine via RESTful hooks.
- Built a real-time responsive web dashboard using Tailwind CSS and Chart.js; implemented power-saving and dry-fire-protection fallback routines for resource conservation.

### Phishing Awareness Simulator

July 2026

*Frontend Web Development Project*

- Engineered a simulated phishing campaign tool using Python and Flask, capable of dispatching customised phishing emails and capturing interaction metrics such as open rates and link clicks.
- Implemented a real-time analytics dashboard built with Chart.js to visualise campaign results, enabling awareness training reports per user or department.
- Designed a post-click educational landing page with dynamic feedback, reinforcing phishing identification skills and aligning with Cyber Threat Management best practices.

## EDUCATION

---

**Amity University, Dubai**

*Bachelor of Science in Information Technology (in progress)*

*Expected Nov 2026*

**Delta English School, Sharjah**

*High School Diploma Equivalent (CBSE – Class 12)*

*2021 – 2023*

## SKILLS

---

**Programming:** Python, C, HTML, CSS, JavaScript

**Web Development:** WordPress, basic PHP, MySQL

**IoT & Hardware:** ESP32, MicroPython, DHT22 sensors, relay arrays

**Tools & Platforms:** Visual Studio Code, Flask, Tailwind CSS, Chart.js, MS Office

**IT Support & Networking:** Software installation, system setup, troubleshooting, basic LAN configuration

**Cybersecurity:** Penetration testing, CTF, vulnerability identification, malware/phishing/encryption awareness

**Languages:** English (fluent), Malayalam (fluent), Hindi (beginner), French (beginner)

## LEADERSHIP & ACTIVITIES

---

- **Dean's Excellence Award** – Amity University Dubai – awarded in recognition of winning the CTF competition and contributing to the university's academic and technical standing.
- **Vice President, CyberAI Club** — leads student-driven AI initiatives and events.
- Active member of the university dance club; enjoys badminton and swimming.

## PERSONAL DETAILS

---

- **Full Name:** Rochelle Bruno Jose
- **DOB:** 15 /09 /2005
- **Nationality:** Indian
- **Marital Status:** Single
- **Open to Work:** 01/07/2026
